EDUCATION

Cornell University, College of Computing and Information Science | Ithaca, U.S.A. May 2025
Master's in Information Science (GPA = 3.79/4.0)

- Relevant Coursework: Data Mining and Machine Learning, Database Systems, Digital Business Strategy

National Taiwan University, College of Management | Taipei, Taiwan Jun. 2023
Bachelor's in International Business (GPA = 3.9/4.0)

- Relevant Coursework: Programming for Business Computing (Python), Big Data Marketing
- Business Analytics Program*
- Relevant Coursework: Statistical Data Analysis for Business and Management, Marketing Analytics

LANGUAGES AND SKILLS

- Languages: Mandarin Chinese (native); English (fluent, C2); Japanese (business level, JLPT N1)
- Programming Languages and Platforms: Python, SQL, R, Databricks, Celonis, GitHub, Azure DevOps
- Generative AI: RAG architecture, Chunking strategy design, Embedding evaluation, Prompt Engineering, Evaluation and experiment management with MLflow
- Data Engineering: ETL/ELT, Workflow Orchestration, Medallion Architecture, SCD, Data Modeling
- Analytics and ML: Hypothesis Testing, Machine Learning with Regression and Classification
- Certifications: Databricks Certified Machine Learning Professional, Databricks Certified Generative AI Associate, Databricks Certified Data Engineer Associate, Databricks Certified Data Analyst Associate

RELEVANT EXPERIENCE

Associate Value Engineer at Celonis | Madrid, Spain Oct. 2026 – Present

- Focusing on Celonis-based process mining, data-driven and generative AI solutions to deliver and realize business value for organizations

Data and AI Consultant at archbricks | Tokyo, Japan Oct. 2025 – Aug. 2026

- Led a cross-functional team of 4 engineers and consultants across Japan and Vietnam to deliver an RAG proof-of-concept over 900+ unstructured documents for a major Japanese semiconductor manufacturer
- Architected and implemented an enterprise RAG system using Databricks, Mosaic AI Vector Search, hybrid retrieval, reranking, metadata filtering, query routing, and Table RAG, achieving a grounded score of over 80% on both LLM-as-a-Judge and human evaluations
- Operationalized LLM evaluation pipelines using MLflow and Unity Catalog, enabling experiment tracking, prompt versioning, and ModelOps workflows for a team of 3 engineers
- Designed enterprise data and GenAI proof-of-concept engagements using Databricks, collaborating directly with stakeholders to define technical and implementation roadmaps
- Orchestrated a User Acceptance Testing session with MLflow to manage over 1,000 assessments with a user satisfaction rate of over 80%

Consultant Intern at beBit TECH | Taipei, Taiwan Feb. 2022 – Jun. 2022

- Executed consumer, industry, and market research to support the formulation of over 3 digital transformation strategies based on methodologies such as user-centric design and net promoter score

SELECTED PROJECT & RESEARCH EXPERIENCE

Ecolab Food Safety Audit Question Recommendation System Feb. 2025 – May 2025

- Engineered a RAG system for Ecolab to provide food safety audit recommendations for restaurant owners, leveraging over 600 FDA audit procedures to generate context-aware corrective actions
- Implemented a zero-shot retrieval framework in Databricks integrating 5 heterogeneous knowledge sources to support enterprise-scale question answering

Estimation and Visualization of Flood Damage in Taiwan ([link](#)) Jan. 2025 – Feb. 2025

- Consolidated 7,000,000 flood observation entries from 5 sources to aggregate flood depth by region
- Developed a Tableau dashboard to visualize geospatial data of 84 flood events across 5 years
